Buses scrapped, or sold for scrap

This is our list of buses that have been scrapped, sold for scrap, or are thought to no longer exist. These buses can be considered to fall into two categories.

Buses scrapped

In most cases, these buses will have been sold to a vehicle dismantler or scrap dealer, where they would be stripped of any useful parts and the remains cut up, so that the vehicle no longer exists. In some cases the dismantling or cutting up has been done by the bus owner and the remains sold to a scrap dealer.

Buses sold for scrap

When buses are sold for scrap, it is probably the intention of the seller that the vehicle should be dismantled. Many of our records are conclusive, in that we record that the buses no longer exist. However, other buses are shown as 'scrapped', but it is possible that while we believe they were sold for dismantling, the physical destruction process may not yet have happened, and the buses may still exist on the dealer's premises in either complete form or in a delapidated condition. We will update the records on this list in due course to identify any buses that we thought had been destroyed that perhaps do still exist in 'sold for scrap' condition.

The buses are grouped into 'Chassis Make' lists, in registration/licence plate order. As always, if you can update or correct anything on this list, please contact us. Please note that there may be some conflicts with buses listed on the 'To Check' page, where this page has been updated and the To Check page has still to be updated.

AEC Bridgemaster

REG NO / LICENCE PLATE	CHASSIS	BODY	STATUS/LAST KNOWN OWNER
4710 AT	AEC Bridgemaster	Park Royal	Presumed to have been scrapped at unknown date by East Yorkshire Motor Services Ltd. (710), following use as a tree lopper.
